## Custom Control Panel Fabrication

With 40+ years of service, we have been the leader in “Engineered to Order” custom electrical control panels of superior quality and workmanship.

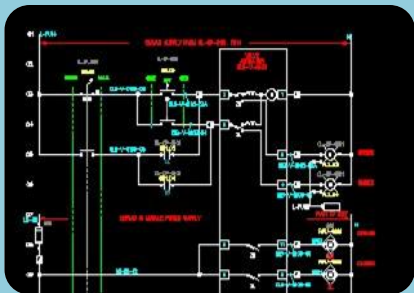

Servicing all manufacturing and utility verticals. As an industry leader, we have kept pace with the ever changing and rapidly advancing technologies which make us competitive.

All equipment manufactured within our plant is subject to a rigid Quality Assurance inspection procedure and in many cases extensive factory acceptance testing (FAT) before shipment. Every panel is fabricated using a strict quality assurance system based on many years development of “best practices”.

We have a dedicated team of employees, which includes experienced wiremen, QA personnel and design engineers. We also have a full complement technical support staff for systems integration and commissioning.

### Electrical Design & Services

Our extensive experience in electrical design enables us to provide clients with complete drawing packages which include:

- Single Line & Power Distribution Drawings (Off-grid Power Systems up to 4160VAC)
- Schematics and I/O Drawings with full wiring cross referencing and bill of materials
- Control Panel Layouts
- Process & Instrument Drawings
- Safety Circuit Drawings
- Networking Diagrams & Architecture
- Logic Flow Diagrams

RTS is an **approved supplier** for:

The City of Toronto

Hydro One Networks

The Ontario Ministry of  
Transportation

### **After 40 years +**

All of our panels are fabricated, wired, and built at our plant to ensure superior quality.

We consistently place an emphasis on customer service and employee satisfaction.

Experienced personnel to assist in FAT's to help solve problems before field installation.

We can build your prototype or 1,000 units.

Quality Components – We use the finest precision-engineered components available, from names you trust.

Providing quality craftsmanship and timely delivery at competitive prices, we achieve excellence and total customer satisfaction on each and every project.

### **Industry Experience:**

Food & Beverage  
Consumer Packaged Goods  
Chemicals  
Mining  
Pharmaceutical  
Power Generation  
Aerospace  
Automotive  
Ethanol/BioFuels  
Water/Waste Water

### **Manufactured Panels:**

- Electrical/PLC/Drives Panels
- Instrumentation
- Motor Control Center / VFD
- Transformer Relay Protection Panels
- Transformer Tap Changing
- Volume Contract Manufacturing
- On-Site Panel Modifications
- Upgrades of existing control panels
- CSA and UL508A Certified
